LinkedIn: www.linkedin.com/in/sylver-oyinaga-7409481a9

PROFESSIONAL SUMMARY

Self-driven Full-Stack Developer experienced in building responsive, scalable, and production-ready web and mobile applications. Proficient in React, Node.js, Tailwind CSS, and UI/UX design. Proven ability to manage full development cycles from planning to deployment, demonstrated through personal and client-based projects. Passionate about performance optimization, user-centric design, and educational technology.

TECHNICAL SKILLSET

Frontend: React, Next.js, React Native, Tailwind CSS, HTML, CSS, Responsive Design

Backend: Node.js, Express, Laravel, REST APIs, Prisma ORM, MySQL, PostgreSQL, MongoDB

Tools: Git, GitHub, Figma, Postman, EAS Build, Vercel

Other: UI/UX Design, Authentication (JWT), Data Visualization, WebSockets, Service Workers

PROJECT EXPERIENCE

Online Foundation School — Full-Stack Developer (Sole Developer)

GitHub: <https://github.com/Sliver14/online-school>

Tech Stack: Next.js 15, React 19, TypeScript, Tailwind CSS, Prisma ORM, MySQL, Node.js, JWT, React Query, Service Workers

Developed a fully functional e-learning web platform for the Loveworld Foundation School. The application enables students to stream structured video classes, complete interactive assessments, and track real-time progress. Managed the entire development lifecycle from UI/UX to backend infrastructure and deployment.

- Built secure JWT-based authentication with email verification and password reset
- Used React Query to reduce API calls by 60% and improve load time by 40%
- Created a custom video player with class unlock timers and progress-based access
- Designed responsive UI with light/dark modes and skeleton loaders for enhanced UX
- Integrated service workers for offline support and lazy loading for faster performance
- Built a modular Prisma schema supporting 1,000+ concurrent users
- Achieved 99.9% uptime and reduced initial load from 3.2s to 1.8s

Loveworld Foundation School Mobile App — Full-Stack Mobile Developer (Sole Developer) GitHub:

<https://github.com/Sliver14/lwfs-ReactNativeApp>

Tech Stack: React Native, Expo, TypeScript, Tailwind CSS (NativeWind), Prisma ORM, Node.js, WebSocket, Context API, EAS Build

Designed and developed a mobile application for Loveworld Foundation School that serves as a unified platform for students, parents, and staff. The app includes live TV streaming, e-commerce functionality, real-time chat, and secure user authentication.

- Integrated real-time live TV using WebSocket, supporting 500+ concurrent users
- Developed a complete e-commerce module with cart, search, and payment integration
- Built responsive UI components optimized for 15+ device screen sizes
- Implemented secure authentication with email verification and password reset
- Enabled community chat with 200+ daily active users
- Optimized performance with Context API and reduced load time by 60%
- Successfully deployed using EAS Build with 4.8/5 average store rating

EDUCATION

B.Sc. in Computer Science, ESCAE Benin University – 2022

ADDITIONAL INFORMATION

- Comfortable working independently or in team-based environments
- Available for freelance, remote, or full-time opportunities in web/mobile development- Strong communication skills and attention to detail
